

TRAKKA®

Meet the TRAKKA's

Advanced Marker Dyes and Foam marker
to Make your Mark.

TRAKKA Red; The next generation Biodegradable RhodamineB replacement.

- ✓ Excellent Compatibility including Phenoxies and Glyphosate
- ✓ Non Reactive and Non Staining – washes off clothing, equipment, hands etc
- ✓ Low mammalian toxicity, biodegradable
- ✓ Effective at low dose rates
- ✓ Easy to see on green vegetation

TRAKKA Blue; Biodegradable Blue

- ✓ Helpful contrasting colour for pale targets and soil types
- ✓ Preferred colour for golf courses and bowling greens

TRAKKA RhodamineB Red; Proven standard

- ✓ Intense colour and high natural fluorescence – easier to see.
- Unfortunately RhodamineB products have a number of issues including – Incompatibility with certain products including some phenoxies and glyphosates, due to cationic nature. **Always put TRAKKA RhodamineB in the tank LAST when the spray tank is FULL.**

Withdrawal from use in the US for toxicological reasons. Highly staining

- ✓ Unlike some other Red Markers TRAKKA RhodamineB Red does not contain Methanol, a hazardous and highly flammable solvent.

TRAKKA Long Life Marker Foam;

- ✓ Long Lasting, Highly Visible and Reliable no matter what the weather
- ✓ Works in Hard Water when other foams give up
- ✓ Works in Cold Water when others struggle to foam
- ✓ Works under hot, bright conditions.

Expect 2.5 to 11 hours foam life under winter conditions and 60 minutes under hot conditions around 30°C.

HINT:- If left in tank ensure a fresh mix every 2 days. Ensure good mixing
